##   <chr>  <int>
## 1 domestic cat    31
## 2 domestic dog     2
## 3 raccoon       24
## 4 sp unknown      1
## 5 white-tailed deer 42
```

We collected 206,466 images. I counted any sighting of different species as unique observations and any sightings of the same species after a period of 30 minutes as unique observations. Of 42 unique observations of White-tailed deer I found that 5 of them had the potential to be instances where direct contact between wild deer and your farmed deer occurred. Due to objects obstructing my viewshed of my cameras I was unable to determine if contact occurred.
